

ROLE	Senior Product Designer
PRACTICE	15+ years of experience in SaaS, web, and mobile app design. I design the systems and build the structure under complex products – the model, the rules, the design system. I lead design strategy with cross-functional partners and mentor designers with clear direction and an open mind. Lately I've been directing AI-assisted builds and agentic workflows, keeping the human experience in front while using AI to move faster through research, testing and validation.
DOMAINS	B2B SaaS · Construction tech · Employee benefits · Fintech and regulated products · CRM · Nonprofits
PLATFORMS	iOS · Android · Responsive Web
PRACTICE AREAS	Information Architecture · Content Modeling · Design Systems · Interaction Design · Prototyping · User Research
LEADERSHIP	Team Leadership · Design Management · Mentoring · Product Strategy · Stakeholder Alignment · Design QA
EXPERIENCE / 5 RECORDS	

2026–PRESENT	Own the Script PRODUCT DESIGNER · NIFLI LLC · iOS APP - Sole designer and product owner on a mobile app that turns a loan officer's single nervous read into a captioned, compliance-checked vertical video. Took it from concept to working build in two months - Designed a 19-rule compliance engine that flags risky language before publish and soft-blocks it with a logged override - Set a deterministic rules floor the AI cannot override, so every compliance decision stays auditable - Designed on-device transcription, captions, and burn-in with no outside API calls, so a recording is ready to post in minutes - Directed the AI-assisted build and owned every product, UX, and scope decision
--------------	---

2020–2026	Efficiently SENIOR PRODUCT DESIGNER - Took design of a B2B construction platform from zero to eight modules, from discovery through implementation - Led a 9-person team including 6 designers, owned all UI/UX, stayed hands-on, and shortened the time from design to implementation - One of three executives, owning design and the handoff from design to engineering across a multilingual team - Built the design function from one designer to six plus a PM, and set the process and critique - Grew the platform from a finish-selection tool into a full scale construction management system - Architected a persistent data system that cut plan-change updates from hours of manual cross-module tracking to minutes - Cut client-ready document creation from days to hours with a canvas-based builder that replaced a Photoshop, InDesign, and Excel workflow - Rebuilt a catalog of 4,000,000+ items from hundreds of vendors with a full filter and search system - Led the item-box style system, where one click restyles every item to a saved brand style across all books - Designed a full change order system for live construction projects, the product's highest-stakes surface - Extended the platform to homeowners with a client approval portal, replacing approvals scattered across email, texts, and phone messages with one source of truth both sides could reach - Ran 20+ user interviews and pushed for validation before expanding scope - Identified the complexity ceiling that moved the platform from self-serve to an internally delivered service model

2010-2020

Passport Unlimited

SENIOR PRODUCT / LEAD DESIGNER 2015-2020 · LEAD GRAPHIC DESIGNER 2010-2015

- Shipped iOS, Android, and responsive web products reaching 500,000+ employees across 80+ enterprise clients including Google, Microsoft, Oracle, and Apple
- Brought design in-house, replacing a months-long agency cycle and reducing \$100,000+ in annual agency fees
- Unified every public-facing surface, including the corporate site, member site, and mobile app, under one brand
- Updated all public-facing properties to meet WCAG accessibility regulations
- Established company-wide design guidelines for product development and customer-facing systems, speeding the path from concept to development
- Managed design across 800+ merchant accounts and their marketing campaigns, grew the role, and was promoted into product design

2017-2020

Soro Software

PRODUCT DESIGN DIRECTOR · CONTRACT

- Designed a responsive CRM and onboarding flow for users with no prior CRM vocabulary, based on research and journey mapping. It was adopted across Seattle-area retail locations, and the company was acquired
- Designed the CRM's information architecture: seven areas, My/All views, and five report families

2026-PRESENT

Pro Bono Design

PRO BONO DESIGNER · 501(C)(3) NONPROFITS

- Rebranded a 501(c)(3) nonprofit and carried the new brand system across web, print and templates
- Designed nonprofit grant proposals, including a \$15,000-\$20,000 request to a federal bar association
- Updated sitewide SEO with structured data and page titles, and set up the organization's first analytics
- Redesigned and launched the site for PacCLEAN, a 501(c)(3) climate policy network, archiving its 25-page legacy site
